Below map classifies your personality based on the traits of the "Big Five" Model. Remember that a low percentile does not mean bad performance and high percentile does not mean good performance, as there is no concept of performance in personality. It is just a measure of who you are as a person. This is important because different job profiles suit different kind of people.

The personality map below shows where your position is relative to the population across different personality traits. Each bar represents your Z-score for a personality trait.

The Z-Score

For each trait, a Z-score is provided. The Z-score measures the number of standard deviations the score is away from mean of norm. A Z-score more than +0.44 means the candidate is in the top 33%, whereas a Z-score of less than -0.44 represents the candidate is in the lowest 33%.

What does "Low", "Medium" or "High" mean?

The classification above in terms of "Low", "Medium" or "High" is a relative positioning of you as compared to the large sample of entry level candidates that have been assessed. For instance, a person who is high on Extraversion is as extraverted as the top 33% people in the control group .He/She may not still be extraverted enough for a given role or a standard set by another individual.

"Low" does not mean "Bad"

A trait score of HIGH or LOW does not classify someone as GOOD or BAD. Every individual has a unique personality and different people in different kind of jobs need different personality combinations. A person with a given personality profile may be inclined to perform better in a sales job while another with a different personality may be more suitable for a software development role.

Competency Result

Detailed description of your profile on each behavioral competency

Openness - General appreciation for imagination and variety of experience.

U

You may tend to have a narrow set of interests and a conventional way of approaching tasks. Likely to be successful in software testing, operations kind of roles.

Conscientiousness - Tendency to show self-discipline. Planned rather than spontaneous behavior.

C

You are likely to have medium level of self-discipline. Generally take a planned approach towards a problem but may become carefree of schedule at times.

Extraversion - Characterized by positive emotions. Enjoying company of others.

I

You seem to have a higher tendency of being an introvert. You might not enjoy high customer interaction related roles.

Competency Result

Agreeableness - Tendency to be compassionate and cooperative.

You are more likely to put your own interests above those of others. As a person you may prefer to work individually.

Emotional Stability - Tendency to remain balanced in ordinary situations. Desirable trait.

You are likely to be an emotional and sensitive person. Might get easily stressed out.
